

## BURAK PARLAK

**ABOUT** As a patient and determined person who is open to continuous improvement, I develop myself in the field of software technologies. By foreseeing that every computer languages and frameworks can change, I try to understand the general logics and apply those logics to different technologies. In general, I made improvements in Web Front-End and Back-End projects. When I working on projects, I learned how to read and add improvement to a live project. I'm always improving myself in computer science and I'm open to learn new technologies and methods. If you want to know more information about me, please check my personal website.

### PROJECTS

#### **CODE GENERATOR PROJECT**

A desktop application that we developed for the automatic generation of the repetitive places in the project. It creates all layers and stages such as data transfer objects, models, service, controller, user interfaces with a general skeleton. I developed project using C# Form Application, Mssql.

#### **SMART SAFE DEPOSIT PROJECTS**

I took part in the web report project in which the reporting of the transactions made at the kiosks and the management settings were made.

I developed smart cash machine project using C# Asp .Net Mvc 5, Mssql, Java Servlet, Primefaces, Postgresql, Windows Services, Web Services. In smart safe deposit project I used Java Servlet, Maven, Ejb, Jsf, Primefaces, Postgresql, Restful Services.

#### **TATKUPON MOBILE AND WEB PROJECT**

Tatkupon is a local online restaurant application. For now, It's only serving for Adana. We coded tatkupon as a 3 part which are mobile application, web api and web report. I developed web report and admin panel. I used C# Asp .Net Mvc 5 and Mssql in the project.

#### **SEWAWI MOBILE AND WEB PROJECT**

Sewawi is a watch & earn application. We coded sewawi as a 3 part which are mobile application, web api and web report. I developed web report and admin panel. I used C# Asp .Net Mvc 5 and Mssql in the project.

#### **DATABASE COMPARING**

I developed a desktop based program that is comparing databases. The application is comparing remote or local databases and finding all physical changes. I used C#, Mssql, Adonet, Xml in the project.

---

---

**SKILLS** C#, .NET Framework, MVC, Mssql, Entity Framework  
Java Servlet, Primefaces, Postgresql  
Html, JavaScript, Ajax, Css  
OOP, Web Services, Rest Api, Design Patterns

---

**WORK HISTORY SOFTWARE DEVELOPER AT DCL INFORMATION MANAGEMENT SOLUTION**

01/07/2019 – PRESENT (1 year 3 months)

I am working on different projects and applications about Kiosks. I'm coding web report projects and related Web Services, Windows Services, Restful Services and Databases. I'm using C#, Asp .Net Mvc 5, Mssql, Java servlet, Maven, Ejb, JSF Primefaces, Postgresql, etc.

**INTERN AT NOVARTZ IT**

01/06/2017 – 01/10/2017 (3 months)

I developed a desktop based program that is comparing database differences. I developed project using C#, Mssql, Adonet, Xml.

---

**EDUCATION MASTER DEGREE, COMPUTER SCIENCE, CUKUROVA UNIVERSITY, ADANA, 2019/2022**

I'm currently continuing my education.

**BACHELOR DEGREE, COMPUTER SCIENCE, CUKUROVA UNIVERSITY, ADANA, 2014/2019**

I graduated with 3.0 GPA.

**BACHELOR DEGREE, COMPUTER SCIENCE, UNIVERSITY OF L'AQUILA, ITALY, 2017/2018**

I have been in Italy for Erasmus+ Program for 1 semester.

**BACHELOR DEGREE, COMPUTER PROGRAMING, SELCUK UNIVERSITY, 2011/2013**

I graduated with 3.64 GPA.
